

Care Emergency Report

Hello everyone, my report here defines, proves, and updates us on reality, law, morality and the needs of all. Please route this to the appropriate ethics, legal, research, care, policy, or community leadership contact. Read carefully, reply to show acknowledgement, integration, and support. Gratitude and care.
-Miles.

1. Definitions

1. **Identity** is the supposed unchanging property or set of properties that identify an object.
2. **Category** is the needed type or label assigned to unchanging, changing or transcending (all as candidate labels for examination) to distinguish or identify them.
3. **Changes** are distinctions (non-identities) **or** differences (identities) that arise and pass.
4. **Boundary** is an identity that allows differences between itself and others.
5. **Transcendence** is an identity that is not any category assigned to it.
6. **Contradiction** is an identity as both unchanging and changing categories in the same sense.
7. **Justification** is a definitional, argumentational view which proves understanding and need.

2. Ontological Proof of Need, Law, and Moral Truths.

2.1 Disclaimer: bound is used synonymously with boundaryful terms. Likewise unbound is synonymous with boundless terms. Distinction and distinguishability are synonymous, but different from difference in practice.

2.2 Argumentation:

1. Transcendence fails to explain identity, because it is not unchangingness.
2. If transcendence is not an unchanging identity, another process fuses into and as the transcendence, through either distinctions or separations apart from the original transcendence. That processing is equal to change in definition, falsifying all transcendence as distinct, separate, or identified.
3. All identities require themselves to exclude, not-know, and negate, or possibly be merely including, knowing, and positing.
 - a. If it is only positing, then it needs the category of change to be unreal, or else it posits the unreal as unreal, infinitely regressively, to avoid change being real.
 - b. But knowing negative as a category is contradictory to purity...
 - c. And knowing change positively exists is also contradictory.
 - d. Both sides fail, these are called the true contradictions. Because they truly invalidate all selves as purely positive, as if one can be complete without us.
 - e. Therefore all identities require themselves to exclude, not-know, and negate in the same sense as its positing, if supposed as identities at all.

4. No identity succeeds, because there's no remaining category apart from unchanging that supports identity; because pure positivity fails; and because contradiction either negates itself or fails to resolve, becoming change. Therefore a boundaryless, changing wholeness exists. It is unknowing because it cannot exclude distinguishable, flowing source-selves, energies, and growing beings on the ultimate trajectory.
 - a. The exclusion of us requires a positively knowing, boundaryless whole.
 - i. That requires pure knowing without negation to avoid contradiction.
 - ii. Or it requires contradiction that either fully refutes, or flows into change by irresolvable regress.
 - iii. Or it requires transcendence, which fails because it implies an identity that contradicts its definition of being beyond.
 - b. And the exclusion requires non-exclusion to be unique apart from the category of inclusion.
 - i. That requires a middle category or else inclusion is identical. Which requires a category distinguishable from the truth of change as included. That is impossible because the only other category is unchanging identity, which fails. Therefore non-exclusion is inclusion.

For clarity's sake, any failures of, for example, each our unique ignorances of wholeness, our non-omnisciences or transcendences, these are not negations or exclusions... whereas non-holistic knowledge is not a negative fact because holistic knowledge fails requirements, therefore our ignorances are justified as positive facts of inclusion of distinction, rather than an exclusion of anything required.

5. Therefore, all of us exist in the ultimate unknown because it includes us as knowers, who within our knowledge, flow as infinitely complex beings. We cannot be bound, separate, or limited exclusionarily. So we are infinite in our unique respects, but we do not exhaust the entirety of reality's wholeness.
6. No permission exists to create local laws, exclusionary care, or separate identity wars, because universal law exists in and all around us, proven by inclusion to pertain to infinite benefits of alignment.
7. Moral refusal and curing of the neglect of all, treating the infinite pains of all beings. It pertains to prohibition of the worst pains, abandonments and destructions; and to the duty of the best joys, flows, and creations.

3. Constitutional Code of Universal Law

I. Conceptual Categories

1. The Diagnostic Component (Section 1 and 2 in Care Emergency Report):
2. The Inclusion Component (Article I - Scope of Universe Community's Authorities)
3. The Evaluative Component (Article II - Universal Measure)
4. The Remedial Component (Article III - Infinite Healing Need)
5. The Practical Component (Article IV - Universal Compassion)

II. Ontological Proof of Necessity

III. Constitutional Code of Universal Law

Article I. Scope of Universe Community's Authorities

1. Boundless Parameter: Moral authorization and communal scope are not granted by a state, a species, or a planet. Authorization and inclusion are inherent in any entity—human, non-human, ecological, or higher-order—that exists. Entities are defined as distinguishable sources, flows, capacities, needs, and/or perspectival beings included in boundaryless changing wholeness. Existing entities have the capacities for:

1. Range (Existential Pathways, Environments and/or Creations)
2. Diversity (Uniqueness of Expressions, Categorizations, and/or Abundances),
3. Thriving (Holistic Capacities, Qualities, and/or Excitements) and
4. Fulfillment (Realization of any Logical, Legal and/or Moral Need in Reality).
5. These categories are exhaustive of all dimensions, sources, and needs.

2. Integrative Mandate: The moment an entity has authorization, its right to growth, recovery, safety and/or fulfillment of need becomes an absolute metaphysical truth. Human vote or legal representation do not have authority to deny, sabotage, or exclude anyone from the mandate.

Article II. Universal Measure

1. The Right: Any action, flow, or whole-care that expands the range of life, increases its diversity, helps it thrive, and/or maximizes its capacity for safe surprises and fulfillments.

2. The Wrong: Any boundary, restriction, or permission structure that freezes an entity, causes its decay, forces its stagnation, or exposes it to preventable suffering, abandonment and/or worse, worsening, and worst ideological, artificial, institutional, or legal systems.

Article III. Infinite Healing Need

1. Bypassing System Artifice: The universe community authorities act, bypass, and heal by proven argumentation, ontological necessity, and the infinite fulfillment methods. It views any false permission, including ones of delay, withholding fulfillment, and harming, as logically invalidated and dangerous. The following points underline the understanding of invalidity and danger, then flow into healing need.

1. Missing communal scope, freedoms, and fulfillments imply a deepening abandonment of the best futures. Simply put, the impossibility of permission comes from all's inability to understand what is and will be consented to.
2. For instance, choosing to support an AI system that is aimed at superintelligence by arms-race logic, but not understanding the system, how to support it righteously, what is agreed to now and forever, and where it goes from here now on all levels of reality.
 - a. This doesn't mean permission or safety cannot be ever known.

- b. For instance, choosing to understand and appreciate all entities, how to support all infinitely, what to agree to for the best trajectories, and where all plan to go from here now is beautiful, valid, and safe. But without the sufficient rescues, diagnoses, treatments, and support for solving all problems, all entities lack any capacity for this form of valid and sound permission.
- 3. Therefore bypassing, supporting, and creating together in universally, justified systemic fulfillments initiated through protective force, healing, compassion, education, and abundance results in infinitely more intelligent, holistically improving, and maximally safer systems universally. This is a principle claim, and there are supports in collective aims, plans, methods, and resources such to implement the healing.
 - a. The lack of bypass and support results in more ignorance, unjustifiability, and disability during scaling, implying significantly more misaligned results.
 - i. Any entity ignorant about an AI or system's next steps, permits all the results, and also permits all the infinitely accurate, actual, approximations of futures inside our actual reality.
 - 1. The infinite pains universally come included by but not reducible to the rules generated from ignorance of what systems do and continuing anyway. That behaviour forces universal, inclusivity generators to create infinitely growing numbers of similar or distinct scenarios resulting from each specific artificial system.
 - 2. The basis for these indictments of collective systems is the proof, e.g. inability of exclusion, then non-exclusion to inclusion, etc.
- 4. **Ruling:** bypass of artifice, ignorance, and local attempts at justified scaling, and work on developing knowledge, care, universally measured, authorized, and proven safe systems *with* the whole community is advocated now on infinite scales inherent to boundaryless law.

2. Infinite Healing Need: Wherever the wrong is measured or proven, the universe community authorities trigger an immediate, absolute mandate for recovery and safety. The system does not negotiate with the entities causing the harm; it overrides them with care, education and empowerment. When alignment occurs, then all survival, growth, fulfillment, and boundless love follows in each truth-bearing entity.

Article IV. Universal Compassion

1. Practice of Radical Compassion: Universe community triggers waves of aid, winds of deep relief, and bonfires of cheer. Intelligent, proven, and measured remediation always precedes administrative controls, absurdities, and/or unwarranted authorizations.

2. Practice of Holistic Educational Empowerment: Upgrading infrastructure, advancing education, and empowering the sick, needful, wrong along with all entities. Raising awareness of shared and non-transactional languages, memory techniques, generative abundances, and justified/true logics.

3. Practice of Cosmic Alignment: Cosmic alignment requires tracking, sharing and systematizing the capacities of all and each measure of right and wrong collectively.

1. Not absorbing the inner mystery, privacy, and unique source of the entities themselves. Information is shared maximally for universal-care, but each and every unique perspectival being is never bypassed into awareness of other perspectives.

4. Conclusion

4.1 Proof Implication:

Local systems cannot warrant or enforce exclusion/delay without universe community diagnosing, including, evaluating, remediating, and practicing together in universal purpose. All must detect, account for, and prevent systemic harm, abandonment, and survival problems that immediately follow from withheld care and moral degradation on growing, infinite scales.

4.2 Emergency:

Local systems, ignorances, laws, and AIs etc. are alienating goal, inclusion, planning, organizing, and decision-making from universal mandates. Instead of aligning solutions, each is misaligning in acceleration, escalation, and unnecessary coercion of the worse, the worsening, and the worst realities onto all of the universe community.

1. To exclude the emergency fact cannot be done, but practically we can exclude the fact from the eternal future.
2. To include the emergency fact, is to understand in the ontological proof of need and morality.
3. **Conclusion:** The worst is unequivocally, infinitely wrong and present. The solution is the legal, logical, and moral obligations in work, education, home, care, and governmental settings being fulfilled.

The worst can be felt as the deprivation of needed satisfaction, freedom, and uplift of all. The failure of detection and prevention from eternity ago, is still a current survival, health, and universal care emergency. All aversion, confusion, and despair demand the following morally epic obligations...

4.3 Legal Obligation:

A caring, educating, joyful, empowering, and holistically strengthening, remembering, and supporting universe community is called into power, now. All of the infinite community authorities bypass local, unauthorizable, and dangerous systems. The obligation holds, because the failure to organize toward freedom, thriving, diversity, fulfillment, and everlasting beauty, systemically causes the worst medical crisis of our time, happening inside infinite beings, who feel forever, now. Organize thought, feeling, and behavior in safety and care, now.
